Executive Summary

HCPHS Health Department

Purpose

The Purpose of this Community Health Assessment is to learn about the health status and quality of life concerns of Halifax County residents, collaborate with citizens by soliciting input from the community, and to provide an overview of resources that exist for handling those concerns. This document is the result of collaboration between Halifax County Public Health System (HCPHS), Healthy Halifax Partners, Roanoke Valley Community Health Initiative, and Halifax County citizens. The Community Health Assessment employed both primary and secondary data to identify and examine the concerns and strengths of Halifax County.

Overview

The 2014 Community Health Assessment, completed every four years, outlines the community's current health status. Based upon findings, steps have been developed to implement interventions, as well as, community resources to address these health issues. The Community Health Assessment team is comprised of many participants representing area agencies in Halifax County, North Carolina. Many local organizations assisted the HCPHS Health Department, and Healthy Halifax Partners, with the creation of this

document. Among those were Halifax Regional Medical Center, Roanoke Valley Community Health Initiative (RV-CHI), Roanoke Rapids Parks and Recreation Department, Weldon City Schools, Halifax County Schools, Roanoke Rapids Graded Schools, Rural Health Group, Roanoke Valley Chamber of Commerce, Halifax-Warren Smart Start, Area L AHEC, Cardinal Innovations, Halifax Community College, The Alice Aycock Poe Center for Health Education, local faith-based organizations and churches.

During monthly meetings, standards for the Community Health Assessment Process and Accreditation were discussed and reviewed for publication in the 2014 Community Health Assessment. Each member reviewed and approved of the Community Health Assessment Survey and Community Resource Directory included in the assessment. After the analysis was completed, of 810 surveys using Survey Monkey, qualitative and quantitative data findings were presented to the Data Assessment Work Group, Community Health Assessment team. The team reviewed the data and developed the top ten major health issues based upon statistical data and community survey results.

Prioritizing Health Concerns

During the months of October through January 2015, a community-wide survey was conducted to give residents an opportunity to express concerns and opinions about the quality of life in Halifax County. Halifax County's self-administered survey included questions about the quality of life, economy, education, environment, health, housing, leisure activities, safety, social issues, transportation, and emergency preparedness. Surveys were distributed strategically across the county in an effort to reach a wide variety of the population. A total of **810 surveys** were included in the final analysis. Based on findings from the community survey combined with secondary health data, in January 2015, Healthy Halifax Partners Task Force members identified ten (10) chief health concerns for the county.

The top ten health concerns are as follows:

- 1. Cancer**
- 2. Diabetes**
- 3. Heart Disease**
- 4. Mental Health**
- 5. Obesity**
- 6. Physical Activity**
- 7. Sexually Transmitted Diseases/HIV**
- 8. Substance Abuse (Alcohol and Drug Abuse)**
- 9. Teen Pregnancy**
- 10. Tobacco Use**

In February, Healthy Halifax Partners, Data Assessment Work Group, and RV-CHI members participated in a prioritization activity to determine the three leading health concerns to be addressed during 2014-2018. The worksheet asked that each of the ten concerns be ranked according to three criteria: Magnitude of the Problem, Seriousness of the Consequences, and Feasibility of Correcting the Problem.

During the Data Assessment Work Group, Community Health Assessment Team meeting, the results from the prioritization process are reviewed and discussed. The final health concerns are named as the focus for the next four-year cycle, 2014-2018.

Results of these worksheets were calculated to come up with the top three priorities, which are as follows:

Chronic Disease

- **Cardiovascular Disease**

Cross-Cutting

- **Obesity**

Physical Activity and Nutrition

- **Physical Activity**

The health priority areas have been set for the members and Data Assessment Work Group to create action plans by September 2015 for implementation. A presentation was given at the Board of Health meeting, Monday, February 23, 2015 to present the 2014 Community Health Assessment and health priority areas. The 2014 Community Health Assessment is available at the health department, public libraries, clinics, hospitals, and schools. A presentation of the 2014 Community Health Assessment is available upon request by the health educator at the Halifax County Public Health System.

Darlene Wolgemuth, Halifax Regional Medical Center

Historical Overview

During Colonial times, the Roanoke Valley emerged as an important commercial center due to the abundance of crops it produced and easy trading access overland to the port city of Norfolk and in small boats down the Roanoke River and across the Albemarle Sound.

Halifax County was created in 1758 from Edgecombe County, and was named for second Earl of Halifax and president of the British Board of Trade and Plantations, George Montagu-Dunk.

The county seat, also named Halifax had been established in 1757 on the Roanoke River and was a hotbed of political activity, where wealthy planters, merchants, and lawyers gathered to debate the issues of the day. In the spring of 1776, the town of Halifax hosted the colony's Fourth Provincial Congress, which on April 12 unanimously approved the "Halifax Resolves" - the first action by an entire colony endorsing independence - a call echoed

through 13 colonies that was instrumental in the action by the Continental Congress in declaring independence from Britain three months later.

Throughout the county's history, the Roanoke River, which extends from Virginia to the Albemarle Sound, has played an important role in the region's

development. At one time, ports were established along the river. Moreover, the Roanoke Canal allowed riverboats to bypass the river’s rapids and travel to Virginia.

Background

Halifax County has a total land area of 725 square miles, with 75.5 persons per square mile (2010 Census). It lies west of the fall line that separates the Piedmont from the coastal plain. It is a picturesque place where country roads wind through fields of cotton, peanuts, soybeans and tobacco. It is a place of great natural beauty and is fast becoming a center of economic development in northeastern North Carolina.

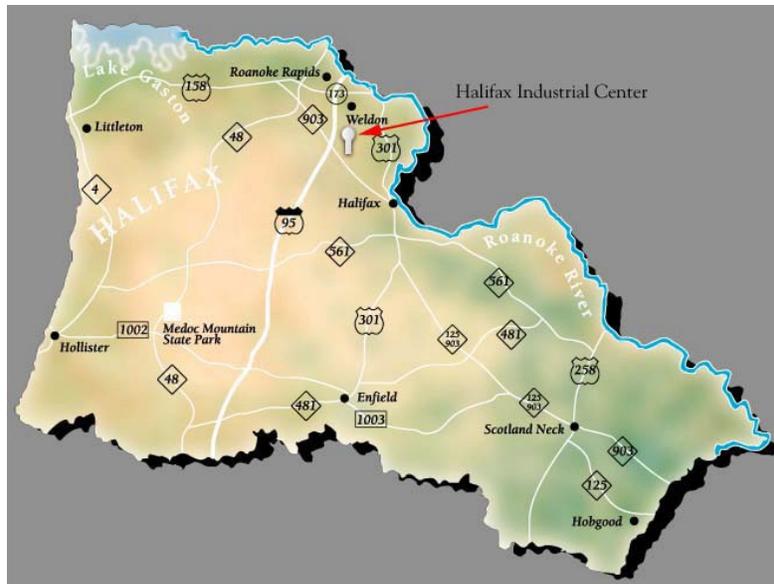

The nearest city with a population above 50,000 is Rocky Mount - 40 miles south of Roanoke Rapids; the nearest with a population over 200,000 is Raleigh - 80 miles southeast of the County; and the nearest city with a population over one million is Philadelphia - 300 miles to the north.

Townships

<u>Townships/Total Population</u>	<u>Survey Respondents</u>
Enfield (2,532)	8.29 percent
Halifax (234; County Seat)	5.69 percent
Hollister (674)	1.73 percent
Hobgood (348)	2.10 percent
Littleton (674)	10.77 percent
Roanoke Rapids (15,754)	54.08 percent
Scotland Neck (2,059)	6.68 percent
Tillery (255)	1.36 percent
Weldon (1,655)	3.96 percent

(2010 US Census Bureau)

Attractions

Halifax County has much in the way of history, recreation and sightseeing to offer its citizens and tourists.

Major attractions include:

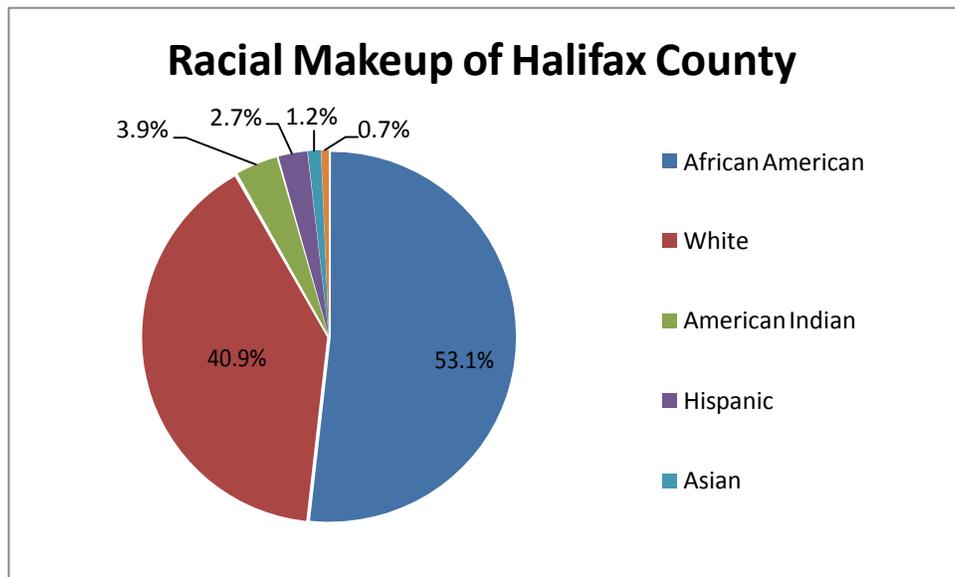

- Lake Gaston in Littleton features over 350 miles of shoreline and is well stocked with game fish, which include striped bass or rockfish, large mouth bass, crappie, sunfish and several varieties of catfish. Below Lake Gaston is Roanoke Rapids Lake, a smaller lake built in 1955 for hydroelectric power.
- The Roanoke Canal Museum and Roanoke Trail contain some of the most impressive and best preserved early 19th century canal construction in the nation and feature a seven-mile trail along the old Canal in Roanoke Rapids.
- Historic Halifax Visitors Center in Halifax offers an audio-visual presentation, exhibits, guided tours and displays depicting the history of the town. Several historic structures are open on the site including the Sally Billy House, the Burgess House, the Halifax County Jail and the Owens House.
- Medoc Mountain State Park in Hollister is granite outcropping with its highest point reaching 325 feet. It is the remains of the core of an ancient mountain range, where picnicking, hiking trails, canoeing, nature study, camping and fishing all await you at this North Carolina State Park.

- Sylvan Heights Water Fowl Park & Eco System in Scotland Neck has the world's largest waterfowl collection of ducks, geese & swans. Also features other exotic birds such as crane, parrot, macaw, brush turkey, cockatoo, kookaburra, pheasant & curassow. New educational facility with accessible, continental aviaries including Australia, Africa, Eurasia, North & South America.

(Halifax County Economic Development Commission)

Population & Demographics

In 2013, North Carolina’s total population was 9,848,060, an increase of 3.3 percent since 2010. The **total population** of Halifax County was 53,453, a 2.3 percent decrease from 2010. Of that number, the population can be broken down in the following percentages: 53.1 percent are African American; 40.9 percent are White; 3.9 percent are American Indian; 2.7 percent are Hispanic; 1.2 percent are Two or More races combined; and 0.7 percent are Asian. Halifax County ranks number five in the State for its American Indian population. Survey results accounted for 57.3 percent African American and 39.6% white. Fifty-two percent of the County’s population is female, and 48 percent is male.

Residents age 45 to 64 are the County's largest age group, making up 29.5 percent of the total population; the next largest are those 25 to 44 with 23.0 percent; 18.6 percent of residents are 14 or under; 16.0 percent are over 65; and the smallest age group are those 15 to 24, which make up 12.9 percent of the population. (2010 US Census Bureau)

Determinants of Health

Social Environment and Economic Issues

Education and Schools

From 2009-2013, residents over 25 years of age totaled 37,149. Of that segment of the population, 9.2 percent had less than ninth grade education (State: 5.7 percent); 15.0% completed ninth through twelfth grade/no diploma (State: 9.4 percent); 35.3 percent were high school graduates or had completed high school equivalency exams (State: 27.0 percent); 20.7 percent had completed some college (State: 21.9 percent); 8.0 percent had an associate's degree (State: 8.7 percent); 7.8 percent had a bachelor's degree (State: 18.0 percent); and 4.0 percent had a Master's, professional, or doctorate degree (State: 9.3 percent). (US Census 2009-2013)

According to survey respondents, 22.4 percent have a high school diploma, 19.7 percent have a bachelor's degree, 18.5 percent have some college, and 16.5% have a graduate or professional degree.

In Halifax County, there are three independent school districts serving more than 7,000 public school students, each offering a wealth of unique and outstanding programs. In addition, Halifax Community College prepares individuals for the workforce through vocational, technical, college transfer, and continuing education learning opportunities.

Halifax County Schools (2013-2014) 3,161 students enrolled. Schools include Aurelian Springs Elementary (Pre-K-5), Dawson Elementary (Pre-K-5), Everetts Elementary (Pre-K-5), Hollister Elementary (K-5), Pittman Elementary (Pre-K-5), Scotland Neck Primary (Pre-K-2), William R. Davie Middle School (6-8), Inborden Elementary-Enfield Middle (K-8), Northwest Halifax High (9-12), and Southeast Halifax High (9-12). According to Director of Auxiliary Services, Phillip Rountree, 92 percent of Halifax County School

students receive free or reduced-price lunch. In the school year 2013-2014, Halifax County Schools met 44 out of 92 Adequate Yearly Progress target goals, 47.8 percent. In 2014, 95 students completed the SAT with an average reported score of 1,135. The number of acts of crime or violence per 1,000 students was 11.2 in all schools during 2012-2013 school year, an increase from 10.8 per 1,000 students in 2011-2012 school year.

Roanoke Rapids Graded School District (2013-2014) 3,033 students enrolled. It is one of only a handful of non-consolidated public school systems remaining in the state. Schools include Manning Elementary (K-5), Belmont Elementary (K-5), Chaloner Middle (6-8), Roanoke Rapids High School (9-12), Akers Alternative Suspension School (K-12), Clara Hearne Early Childhood Center (Pre-K), and Place to Playschool (After School Care for Elementary-aged students). Michelle Puckett, Child Nutrition Director, explained 60.0 percent of the district's students receive free or reduced-price lunch, up from 54 percent in 2010. Roanoke Rapids Graded School District met 79 out of 103 Adequate Yearly Progress target goals, 76.7 percent, in the 2013-2014 school year. In 2014, 68 students completed the SAT with an average reported score of 1,435. The number of acts of crime or violence per 1,000 students was 6.3 in all schools during 2012-2013 school year, an increase from 4.4 per 1,000 students in 2011-2012 school year.

Weldon City Schools (2013-2014) 1,045 students enrolled. Schools include Weldon Pre-K, Weldon Elementary (K-5), Weldon Middle (6-8) and Weldon High School (9-12). According to Federal Programs/Parent Involvement Director, Terry Alston, 78.4 percent of Weldon City Schools' students receive free or reduced-price lunch. The school district met 33 out of 56 Adequate Yearly Progress target goals, 58.9%, in 2013-2014. In 2014, 78 students completed the SAT with an average reported score of 1,193. The number of acts of crime or violence per 1,000 students was 3.07 in all schools during 2012-2013 school year, a decrease from 6.0 per 1,000 students in 2011-2012 school year.

Private Schools in Halifax County include Halifax Academy in Roanoke Rapids (Pre-K-12), KIPP Gaston College Prep in Gaston (K-12), Hobgood Academy in Hobgood (K-12), and Cornerstone Christian Academy in Roanoke Rapids (K-12).

Dropout Rates

Halifax County Schools total number of dropouts was 29, a rate of 3.11 per 1,000, a decrease from 2011-2012 school year of 5.54 per 1,000. **Weldon City Schools** number of dropouts was 12, a rate of 3.32 per 1,000; an increase from 2011-2012 school year of 2.03 per 1,000. **Roanoke Rapids City Schools** total number of dropouts was 20, a rate of 2.19 per 1,000, a significant decrease from 2011-2012 school year of 5.52 per 1,000. The state's dropout rate for 2012-2013 was 2.45, a decrease from 3.01 in 2011-2012.

Halifax Community College

Halifax Community College was established in 1967. Halifax Community College is a public two-year college governed by a local Board of Trustees located in Weldon, North Carolina. This institution offers Associates Degrees, Associates in Applied Science Degrees and Workforce and Economic Development Programs through five curriculum divisions with 48 curriculum programs including Dental Hygiene, Medical Laboratory Technology, Business Administration and more. Below is a breakdown of enrollment by age and race. Halifax Community College has an average curriculum student enrollment of 2,901 while Workforce and Economic Development Programs have an average yearly enrollment of 5,091.

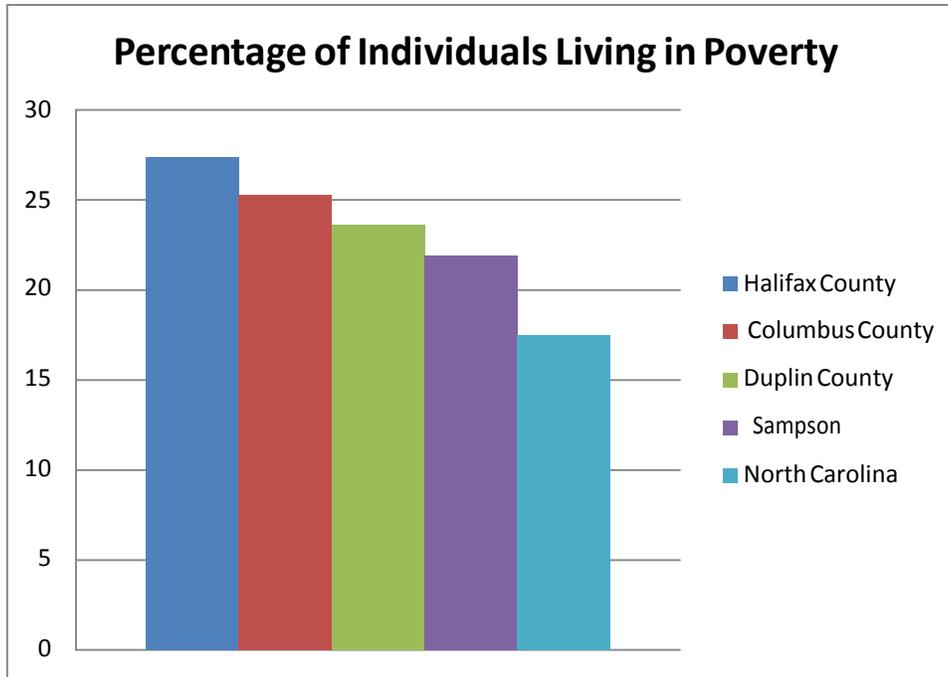

Households & Homeownership Rates

From 2009-2013, there was an average of 21,550 households in Halifax County. The median number of years in residence is two. The **average household size** is 2.45 people, and the **average family size** is 3.06 people. The average **median value of owner-occupied housing units** in Halifax County was \$86,100 from 2009-2013, compared to the North Carolina average of \$153,600. (2013 US Census Bureau)

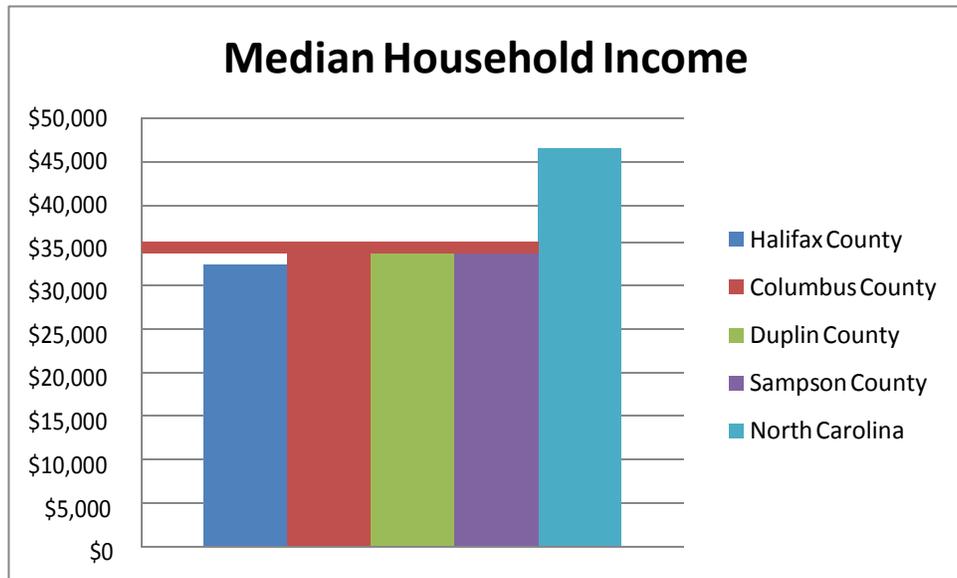

Income and Poverty Levels

The **percentage of individuals living below the poverty level** in Halifax County (2009-2013) was 27.4 percent, above the state at 17.5 percent. Halifax County's percentage of individuals living in poverty is average compared to peer counties, Columbus 25.3 percent, Duplin 23.6 percent, and Sampson 21.9 percent. Below is a chart of individuals living in poverty including comparisons of peer counties. (Access NC)

Income

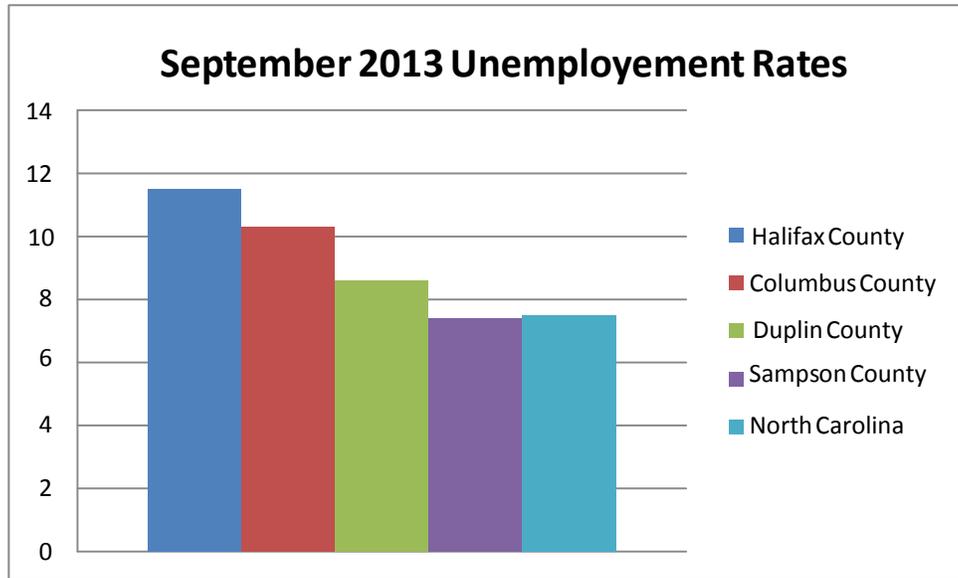

Halifax County’s average **median household income** from 2009-2013 was \$32,329, and the state’s was \$46,334. The **median household income** from 2009-2013 for peer counties included Columbus \$35,761, Duplin \$34,433, and Sampson \$36,496. Halifax County’s median household income is below North Carolina as well as the three peer counties used for comparison. 21.6 percent of survey respondents make between \$30,000-49,999 and 15.4 percent make less than \$10,000. (2013 Census Bureau)

Labor Force

The **average weekly wage** for Halifax County is \$565.25 The **top ten largest employers** in order are Halifax Regional Medical Center (872 employees), Halifax County Schools (700 employees), County of Halifax (546 employees), Kapstone Paper and Packaging (459 employees), Roanoke Rapids Graded Schools (389 employees), AAA Carolina’s (282 employees), Safelite Glass Corporation (197 employees), Reser’s Fine Foods (340 employees), New Dixie Oil Corporation (239 employees), and Halifax Community College (250 employees).

Of the 30,272 residents considered part of the workforce, 26,654 were employed, and 3,678 were unemployed. This data placed the County’s **unemployment rate** at 11.5 percent in 2013, compared to 7.5 in North Carolina. The unemployment rate in 2010 was at 11.0 percent compared to North Carolina unemployment rate of 9.1 percent. The unemployment rate in 2013 for the peer counties is as follows: Columbus 10.3 percent, Duplin 8.6 percent, and Sampson 7.4 percent. Halifax County’s unemployment rate is higher than the peer counties. According to survey respondents, 8.5% are unemployed. (Access NC)

Health Resources

Barriers to Access of Healthcare

The North Carolina Health Professionals Data System gives the following information on health professional to patient ratios for 2012:

	Halifax County	North Carolina
Physicians	13.3	22.3
Primary Care Physicians	6.3	7.6
Dentists	2.4	4.5
Dental Hygienists	5.7	5.6
Pharmacists	7.6	10.1
Nurses	80.2	103.8
Nurse Practitioners	2.4	4.3
Physician Assistants	2.4	4.1
Licensed Practical Nurses	20.3	18.5
Occupational Therapists	0.6	2.8
Respiratory Therapists	5.0	4.3
Physical Therapists	2.2	5.5

*Above Numbers based on 10,000 populations.

(www.shepcenter.unc.edu)

Access to healthcare providers is more problematic for Halifax County residents than the State as a whole. Halifax County when compared to two of the three peer counties, Columbus, and Sampson, has on average the same health care providers per 10,000 population. Halifax County has more access to healthcare providers than peer county, Duplin. The barriers to access to healthcare are related to the number of healthcare providers located within Halifax County. Many citizens have little or no transportation to and from surrounding counties to receive quality of care. Another barrier to access to health care was identified in the 2014 Community Health Assessment surveys where 59.3 percent explained lack of insurance/unable to pay for doctor's visit is the main reason that keeps people from seeking medical treatment.

Satisfaction with Healthcare

According to the 2014 Community Health Assessment survey results, 86.3 percent of respondents currently have health insurance in Halifax County. From 2009-2013, an average of 84.5 percent of Halifax County residents' has health coverage, higher than three peer counties, Columbus, Duplin, and Sampson County. (US Census Bureau)

Hospitals

Halifax Regional Medical Center in Roanoke Rapids serves Halifax and Northampton Counties with many patients also coming from Warren County and southern Virginia. It is

licensed to operate as a 204-bed facility, 20 of which are dedicated licensed psychiatric beds, and has approximately 60 physicians. Halifax Regional Medical Center employees 657 full-time employees and 117 part time employees. Halifax Regional Medical Center has had much success over the past years with twenty-one nurses named on the top 100 Nurses of North Carolina.

2014 Hospital Utilization:

Admissions: 5,382

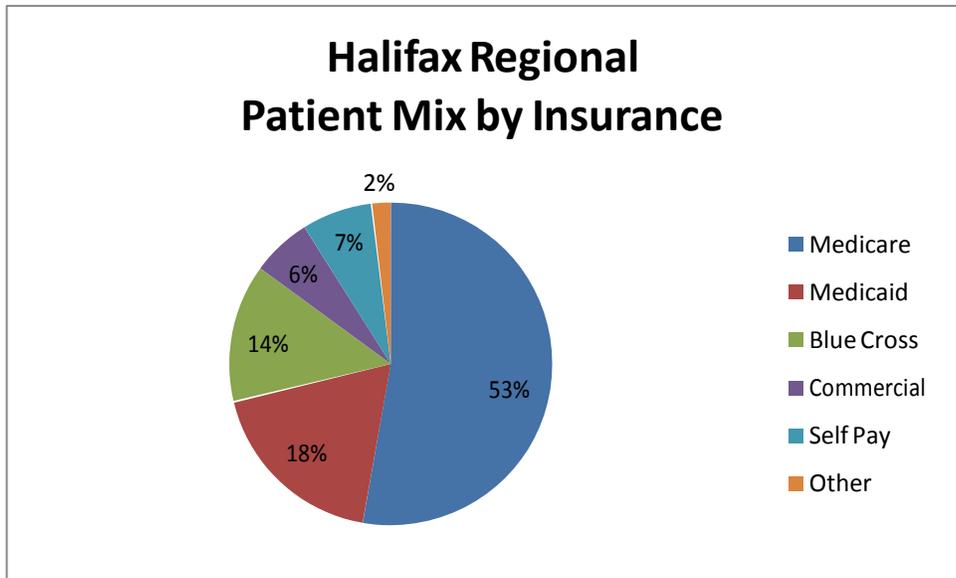

Births: 621

Emergency Visits: 38,870

Outpatient Visits: 31,870

Surgical Cases: 3,936

According to Halifax Regional Medical Center, the hospital’s patient makeup is reflected in the following based on cost reimbursement for services: Medicare 53.0 percent; Medicaid 18.4 percent; Blue Cross 14.0 percent, Commercial 6.0 percent; Self Pay 7 percent; and Other 2 percent.

Our Community Hospital is a 60-bed private, not-for-profit hospital located in Scotland Neck, NC. Our Community Hospital is located in the southeastern portion of Halifax County close to the banks of the lovely Roanoke River. The hospital is the only medical center within a 20-mile radius and works closely with Scotland Neck Family Medical Center.

Roanoke-Chowan Hospital is an 114-bed, not-for-profit hospital located in Ahoskie, NC. This modern facility provides a wide range of health services to Bertie, Gates, Hertford, and Northampton County. As part of Vidant Health, it offers a wide range of services at its facilities in Ahoskie, N.C. In addition, patients have access to advanced treatment through facilities and clinics in other locations.

Southern Virginia Regional Medical Center in Emporia, Va. is an 80-bed licensed hospital located 18 miles north of Roanoke Rapids just off I-95.

Nash Health Care System is an affiliate of UNC Health Care in Rocky Mount and is a 282-bed acute care facility that serves Nash, Edgecombe, Halifax, Wilson and Johnston counties.

Health Status

According to the 2013 BRFSS results, when asked “What would you say that in general your health is?” 18.2 percent of the total respondents in Eastern North Carolina were in excellent health, compared to 18.3 percent of North Carolina respondents. 27.4 percent of Eastern North Carolina respondents were in very good health, compared to 31.6 percent NC, 34.3 percent of Eastern North Carolina were in good health compared to 31.0 percent of North Carolina, 14.1 percent of Eastern North Carolina were in fair health compared to 13.8 percent North Carolina, and 5.4 percent of Eastern North Carolina were in poor health compared to 6.0 percent North Carolina. In conclusion, over 60 percent of Eastern North Carolina thought they were in very good to good health status compared to 73 percent of Community Health Assessment survey respondents. (Data is not available by county.)

Mental Health

According to the BRFSS results, when asked “Now thinking about your mental health, which includes stress, depression, and problems with emotions, for how many days during the past 30 days was your mental health not good?” 72.0 percent of Eastern North Carolina responded no days, compared to 69.6 percent of North Carolina. 5.6 percent of

Eastern North Carolina responded to having at least 1-2 days, 6.7 percent North Carolina; 7.1 percent of Eastern North Carolina had 3-7 days, 8.9 percent of North Carolina; 9.5 percent of Eastern North Carolina had 8-29 days, 8.9 percent of North Carolina; 5.8 percent of Eastern North Carolina had over 30 days, compared to 6.0 percent of North Carolina. Just over 1.5 percent of Halifax citizens' surveyed felt mental health was a concern to their family. 13.9 percent of citizens surveyed have been told by a doctor they have a form of depression.

Health Data

Mortality Data

- 668 deaths among Halifax County residents in 2013
- Leading causes of death are heart disease, cancer, cerebrovascular disease (stroke), chronic lower respiratory disease, and diabetes.
- Halifax County Mortality Rates for all causes except Alzheimer's Disease and Suicide are higher than the state rates. The mortality rate for Alzheimer's Disease has nearly doubled since 2009 in Halifax County.
- Halifax County Mortality Rates for Heart Disease are higher than two of the three peer counties.
- Halifax County Mortality Rates for Diabetes is significantly higher than two of the three peer counties.
 - Halifax County: 54.3 Death Rate
 - Columbus County 21.0 Death Rate
 - Duplin County: 31.6 Death Rate
 - Sampson County: 56.1 Death Rate

Blood Pressure, Cardiovascular and Heart Disease

As identified in the assessment as a health priority area of focus for the next four years, heart disease continues to be a growing problem in Halifax County. According to assessment survey data, 40 percent of citizens have been told they have high blood pressure and a third of respondents believe high blood pressure is the biggest issue that affects their family. Eastern North Carolina has a higher percentage of people who have high blood pressure compared to North Carolina.

HCPHS Health Department provides monthly screenings throughout the county at various locations to offer blood pressure, blood cholesterol, and blood sugar screenings. Body mass index, height and weight checks are also provided during the monthly screenings. Many citizens of Halifax County participate in the free monthly screenings to track the progress of goals set by individual.

Substance abuse continues to be an issue in Halifax County. Resources to support rehabilitation are very limited. The county’s mental health system has been forced to merge with other mental health facilities. It is more difficult to access mental health care in Halifax County. Mental Health programs became privatized and various providers such as “BEARS”, “Triumph” and “NOVA” have closed during the reorganization of the mental health provision. Clients find themselves frequently transitioning to new providers or loss to follow up. According to those surveyed, 11.1 percent felt use of alcohol was the biggest issue affecting their family while 18 percent said use of tobacco products.

Infant mortality

The infant mortality rate for Halifax County in 2013 was 9.0 per 1,000 live births, accounting for five (5) infant deaths in Halifax County. North Carolina’s infant mortality rate was 7.9 per 1,000 live births in 2013 accounting for 832 infant deaths. All peer counties and North Carolina, on average, have lower infant death rates compared to Halifax County. Halifax County’s infant mortality rate has decreased since 2009. The infant mortality rate in 2009 for Halifax County was 9.2 per 1,000 live births.

Infant Mortality Rates

	2013	2012	2011
Halifax County	9.0	11.9	15.6
Columbus County	9.2	3.2	9.2
Duplin County	8.0	8.0	3.7
Sampson County	5.9	7.0	15.5
North Carolina	7.0	7.4	7.2

Per 1,000 Live Births

Teen Pregnancy Rates

Overall the pregnancy rate for Halifax is similar to the peer counties and higher than the state rate. Over the past three years, the teen pregnancy rate has decreased from 64.1 per 1,000 population to a rate of 54.2 in 2013. Since 2006, the teen pregnancy rate has decreased from 92.3 per 1,000 to a rate of 77.5 per 1,000 in 2009. The overall Teen Pregnancy Rate for North Carolina has also decreased from 63.1 in 2006 to 56.0 in 2009.

Environmental Health Issues

Food and Lodging Inspections

In 2014, a total of 688 restaurants in Halifax County are included with inspection grades. Of those, 540 received a grade “A” and 15 received a “B”. As of November 2010, the County had a total of 39 complaints that were reported and investigated related to restaurant facilities. In 2014, 68 water samples were collected for well and septic inspections.

Lead Testing Results

Halifax County had a higher percentage of children ages 1-2 where blood lead was greater or equal to 10 compared to North Carolina and Peer Counties.

Indoor and Outdoor Air Quality

Many agencies, schools, and local organizations are moving in the right direction to becoming smoke free. In January 2010, all local restaurants became smoke free in Halifax County. In 2008, Halifax Regional Medical Center became a smoke free campus. All three school systems, Roanoke Rapids City Schools, Weldon City Schools, and Halifax County Schools have all become smoke free campuses as well. Outdoor air quality remains in good to moderate standing for the majority of the year. The air quality during the middle of April and the first of July tends to reach the orange level, which is classified as unhealthy for sensitive groups such as those with asthma and elderly. During other times throughout the year, the ozone concentrations remained in the green and yellow categories, good to moderate conditions for air quality.

Transportation

According to US Census Bureau, among the occupied housing units in Halifax County 12.9 percent have no vehicles, 32.6 percent have one vehicle, 32.2 percent have two vehicles available and 22.3 percent have three or more vehicles available. Among the occupied housing units in North Carolina, 6.5 percent have no vehicles, 31.9 percent have one vehicle, 38.5 percent have two vehicles available and 23.1 percent have three or more vehicles available. Over 80 percent of Halifax County residents commute to work utilizing a personal car, compared to 79 percent of North Carolina.

Health Disparties

Health Disparties are demonstrable among racial distributions. According to 2013 Census figures, approximately 22 percent of North Carolina's population is African American/Black. Halifax County's distribution in 2013 showed that 40.9 percent were Caucasian/White, while 61.6 percent were the minority population consisting of African American 53.1 percent, American Indian and Alaskan Native 3.9 percent, Asian and Hispanic (2.7 percent combined). North Carolina's African Americans are more likely to live in poverty (33 percent) and more likely than whites to have no health insurance (22 percent). Poverty and lack of access to health care are two main reasons North Carolina's

African Americans are generally in poorer health than whites and other racial and/or ethnic minorities based on mortality and disease incidence patterns.

Due to the demographics of Halifax County and being a rural county, many citizens do not have access to transportation to receive medical care and other services. The only public transportation is via the (CPTA) Choanoke Public Transportation Authority. Most of the medical offices are located in Roanoke Rapids, which can be more than a 30-minute ride from the farthest communities in Halifax County. Employment is a challenge due to transportation issues as the primary businesses and industries are located in Roanoke Rapids. Several restaurants and small businesses have also closed; therefore, eliminating job opportunities.

There is limited availability of tertiary centers; Vidant Medical Center is 1.5 hours east of Halifax County and Chapel Hill, Duke Medical and Wake Medical are 1.5 hours southwest of Halifax County.

There are many health disparities identified within the three areas of health identified in the 2014 Community Health Assessment:

- Heart Disease
- Physical Activity and Nutrition
- Obesity

Appendix A

2014 Halifax County Community Health Assessment Survey

Halifax County Community Health Assessment

A survey conducted by Halifax County Public Health System

1. How do you rate <u>your own health</u>? (check only one)			
<input type="checkbox"/> Excellent	<input type="checkbox"/> Very Good	<input type="checkbox"/> Good	<input type="checkbox"/> Fair
<input type="checkbox"/> Poor	<input type="checkbox"/> Don't Know/Not Sure		
2. What is the biggest <u>health issue</u> in your <u>family</u>? (check only one)			
<input type="checkbox"/> Asthma/Lung Disease	<input type="checkbox"/> Cancer	<input type="checkbox"/> Diabetes	<input type="checkbox"/> Teen Pregnancy

## **Prioritizing Community Health Needs**

## **Appendix C**

### **Prioritizing Community Health Needs**

During the months of October through January 2015, a community-wide survey was conducted in order to give residents an opportunity to express concerns and opinions about the quality of life in Halifax County. The survey was reviewed by the Community Health Assessment team, approved with little changes and revisions. Halifax County's self-administered survey included questions about the quality of life, economy, education, environment, health, housing, leisure activities, safety, social issues, transportation, emergency preparedness and elder issues. Surveys were distributed strategically across the county in an effort to reach a wide variety of the population. A total of **810 surveys** were included in the final analysis.

### **Selection of Priority Areas**

Based on findings from the community survey combined with secondary health data, Healthy Halifax Partners, Healthy Carolinians Task Force, members identified ten (10) chief health concerns for the county in September of 2010. Secondary health data and primary health data from surveys analyzed were reviewed extensively during a meeting where members voted and prioritized health needs of Halifax County.

**The top ten health concerns are as follows:**

- 1. Cancer**
- 2. Diabetes**
- 3. Heart Disease**
- 4. Mental Health**
- 5. Obesity**
- 6. Physical Activity**
- 7. Sexually Transmitted Diseases/HIV**
- 8. Substance Abuse (Alcohol and Drug Abuse)**
- 9. Teen Pregnancy**
- 10. Tobacco Use**

In February, Halifax Healthy Carolinians Task Force members, Data Assessment Work Group and RV-CHI members participated in rating the top three out of ten health concerns using a Prioritization Worksheet. The worksheet asked that each of the ten concerns be ranked according to three criteria: Magnitude of the Problem, Seriousness of the Consequences, and Feasibility of Correcting the Problem.

**Results of these worksheets were calculated to come up with the top three priorities, which are as follows:**

**Chronic Disease**

- **Cardiovascular Disease**

**Cross-Cutting**

- **Obesity**

**Physical Activity and Nutrition**

- **Physical Activity**

## **Water Quality Test Reports**

# "2013" Annual Drinking Water Quality Report "Halifax County"

PWS ID'S - 04-42-040 Halifax County  
04-42-025, Enfield

We are pleased to present to you this year's Annual Drinking Water Quality Report. This report is a snapshot of last year's water quality. Included are details about from where your water comes, what it contains, and how it compares to standards set by regulatory agencies. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water and to providing you with this information, because informed customers are our best aBies. If you have any questions about this report or concerning your water, please contact Greg Griffin at 252-583-1451. We want our valued customers to be informed about their water utility.

## What EPA Wants You to Know

Drinking water, including bottled water, may reasonably be expected to contain at least smaJI amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk . More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline (800-426-4791).

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

If present, elevated levels of lead can cause serious health problems, especiaJiy for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Halifax County Public Utilities is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>.

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity. Contaminants that may be present in source water include microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife; inorganic contaminants, such as salts and metals, which can be naturally-occurring or result from urban storm water runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming; pesticides and herbicides, which may come from a variety of sources such as agriculture, urban storm water runoff, and residential uses; organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production , and can also come from gas stations, urban storm water runoff, and septic systems; and radioactive contaminants, which can be naturally-occurring or be the result of oil and gas production and mining activities.

In order to ensure that tap water is safe to drink, EPA prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. FDA regulations establish limits for contaminants in bottled water which must provide the same protection for public health.

## When You Turn on Your Tap, Consider the Source

Water sources used by our systems are the Roanoke River and Roanoke Rapids Lake in the Halifax County System, and Fishing Creek in the Enfield System. We purchase water for resale from the Roanoke Rapids Sanitary District, the Town of Weldon, and the Town of Enfield.

## Source Water Assessment Program (SWAP) Results

The North Carolina Department of Environment and Natural Resources (DENR), Public Water Supply (PWS) Section, Source Water Assessment Program (SWAP) conducted assessments for all drinking water sources across North Carolina. The purpose of the assessments was to determine the susceptibility of each drinking water source (well or surface water intake) to Potential Contaminant Sources (PCSs). The results of the assessment are available in SWAP Assessment Reports that include maps, background information and a relative susceptibility rating of Higher, Moderate or Lower.

The relative susceptibility rating of each source for Halifax County Systems was determined by combining the contaminant rating (number and location of PCSs within the assessment area) and the inherent vulnerability rating (i.e., characteristics or existing conditions of the well or watershed and its delineated assessment area.). The assessment findings are summarized in the table below:

### Susceptibility of Sources to Potential Contaminant Sources (PCSs)

| Source Name   | Susceptibility Rating | SWAP Report Date |
|---------------|-----------------------|------------------|
| Roanoke River | Moderate              | February 2010    |
| Fishing Creek | Higher                | February 2010    |

The complete SWAP Assessment report for Halifax County Systems may be viewed on the Web at: [www.ncwater.org/pws/swap](http://www.ncwater.org/pws/swap). Note that because SWAP results and reports are periodically updated by the PWS Section, the results available on this website may differ from the results that were available at the time this CCR was prepared. If you are unable to access your SWAP report on the web, you mail a written request for a printed copy to: Source Water Assessment Program -Report Request, 1634 Mail Service Center, Raleigh, NC 27699-1634, or email requests to [swap@ncdenr.gov](mailto:swap@ncdenr.gov). Please indicate your system name, number, and provide your name, mailing address and phone number. If you have any questions about the SWAP report please contact the Source Water Assessment staff by phone at 919-707-9098.

It is important to understand that a susceptibility rating of "higher" does not imply poor water quality, only the system's potential to become contaminated by PCSs in the assessment area.

### Violations that Your Water System Received for the Report Year

During 2013, or during any compliance period that ended in 2013, we received violations for total Haloacetic Acids and Trihalomethanes in the Enfield System (ID no. 40-42-002). We had one total Coliform Bacteria violation for a Sampling event in October 2013 System (ID no. 04-42-040) due to a missed sample. We have taken steps to assure this does not happen again.

North Carolina Department of Environment & Natural Resources has mandated a new Compliance Monitoring Plan (Stage 2) for Disinfectants & Disinfection Byproducts Rule effective July 1, 2013 for Public Water Systems in North Carolina. Halifax County has requested an extension from the State due to improvements within the Water System, looping water mains, extending new water mains around the Town of Enfield, eliminate purchase of water from Enfield.

## NOTICE TO THE PUBLIC

### IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Violation Awareness Date: February 19, 2014

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During the compliance period specified in the table below, we did not complete all monitoring or testing for the contaminants listed and therefore cannot be sure of the quality of your drinking water during that time.

| CONTAMINANT GROUP                        | FACILITY ID NO./ SAMPLE POINT ID | COMPLIANCE PERIOD BEGIN DATE | NUMBE OF SAMPLES/ SAMPLING REQUENCY | When Samples Were Or Will Be Taken                                     |
|------------------------------------------|----------------------------------|------------------------------|-------------------------------------|------------------------------------------------------------------------|
| Total Coliform and Disinfectant Residual | DOI                              | October, 2013                | 20 / Weekly                         | 1 sample of 20 missed one week in Nov. Sampling resumed following week |

(BA) Total Coliform Bacteria – includes testing for Total Coliform bacteria and Fecal/E.coli bacteria. Testing for Fecal/E.coli bacteria is required if total coliform is present in the sample.

What should do? There is nothing you need to do at this time.

What is being done? There were 20 samples required for this event. Only 19 samples were taken. The complete set of 20 samples were resumed the following week.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

For more information about this violation, please contact the responsible person listed in the first paragraph of this report.

---

#### Water Quality Data Table of Detected Contaminants

Our vendors and we routinely monitor for over 150 contaminants in your drinking water according to Federal and State laws. The table below lists all the drinking water contaminants that we detected in the last round of sampling for the particular contaminant group. The presence of contaminants does not necessarily indicate that water poses a health risk. Unless otherwise noted, the data presented in this table is from testing done January 1 through December 31, 2013. The EPA or the State requires us to monitor for certain contaminants less than once per year because the concentrations of these contaminants are not expected to vary significantly from year to year. Some of the data, though representative of the water quality, is more than one year old.

Unregulated contaminants are those for which EPA has not established drinking water standards. The purpose of unregulated contaminant monitoring is to assist EPA in determining the occurrence of unregulated contaminants in drinking water and whether future regulation is warranted.

#### Important Drinking Water Definitions:

*Not-Applicable (N/A)* - Information not applicable/not required for that particular water system or for that particular Rule.

*Non-Detects (ND)*- laboratory analysis indicates that the contaminant is not present at the level of detection set for the particular methodology used.

*Parts per million (ppm) or Milligrams per liter (mg/l)* -one part per million corresponds to one minute in two years or a single penny in \$10,000.

*Parts per billion (ppb) or Micrograms per liter-* one part per billion corresponds to one minute in 2,000 years, or a single penny in \$10,000,000.

*Parts per trillion (ppt) or Nanograms per liter (nanograms/l)*- one part per trillion corresponds to one minute in 2,000,000 years, or a single penny in \$10,000,000,000.

*Parts per quadrillion (ppq) or Picograms per liter (picograms/l)*- one part per quadrillion corresponds to one minute in 2,000,000,000 years or one penny in \$10,000,000,000,000.

*Picocuries per liter (pCiL)* - picocuries per liter is a measure of the radioactivity in water.

*Million Fibers per Liter (MFL)* - million fibers per liter is a measure of the presence of asbestos fibers that are longer than 10 micrometers.

*Nephelometric Turbidity Unit (NTU)* - nephelometric turbidity unit is a measure of the clarity of water. Turbidity in excess of 5 NTU is just noticeable to the average person.

*Action Level (AL)* -the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

*Treatment Technique (TT)* - A treatment technique is a required process intended to reduce the level of a contaminant in drinking water.

*Maximum Residual Disinfection Level Goal* -The "Level" (MRDLG) of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

*Maximum Residual Disinfection Level* - The "Highest Level" (MRDL) of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

*Maximum Contaminant Level*- The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology

*Maximum Contaminant Level Goal*- The "Goal"(MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Extra Note: MCL's are set at very stringent levels. To understand the possible health effects described for many regulated constituents, a person would have to drink 2 liters of water every day at the MCL level for a lifetime to have a one-in-a-million chance of having the described health effect.

| Constituent                | Highest Level Allowed    | Ideal Goals (Epa's MCLG) | Normal Range             | Frequency Of Sample | Halifax Annual Average | Source Of Constituents               |
|----------------------------|--------------------------|--------------------------|--------------------------|---------------------|------------------------|--------------------------------------|
| Fluoride                   | 4mg/l                    | 4mg/l                    | .65rn/1                  | Every 4 hours       | .60 mg/L               | Natu rally occurring, Water additive |
| Nitrate                    | 10mg/L                   | 10mg/l                   | 1mg/1                    | Yearly              | Less than 1 mg/L       | Wildlife & Septic Systems            |
| Sodium                     | Not Regulated            | 20 mg/L                  | 15mg/l-25 mg/L           | Yearly              | 17.0 mg/L              | Naturally occurring                  |
| Sulfate                    | Not Regulated            | 500mg/L                  | None                     | Yearly              | 14.6 mg/L              | Soil runoff                          |
| Turbidity                  | .3ntu's                  | Treatment Technique      | .1NTU-.5NTU              | Every 4 hours       | .048NTU'S              | Soilrunoff                           |
| Total Coliforms (Bacteria) | less than 5% 5% positive | 0                        | less than 5% 5% positive | Daily               | 0                      | Naturally occurring                  |
| Iron                       | .3mg/1                   | .3mg/1                   | less than .3 mg/1        | weekly              | .14mg/1                | Naturally occurring                  |
| Manganese                  | .05 mg/1 (action level)  | .05 mg/1 (action level)  | less than .05mg/1        | weekly              | .05 mg/1               | Naturally occurring                  |

**The mission of the Roanoke Rapids Sanitary District is to affordably provide the highest quality water services; then safely collect wastewater and return clean water to the environment while promoting public trust and partnerships to the benefit of our associates and the satisfaction of our customers.**

The Roanoke Rapids Sanitary District, a municipal corporation, was created by the North Carolina State Board of Health on April 21, 1931; under and by virtue of an act of the General Assembly, ratified on March 4, 1927, providing for the creation, government and operation of Sanitary Districts. The Roanoke Rapids Sanitary District is governed by a 3-member board; which is elected, at large, to two year terms. Should you have any questions concerning this Report, please call our Administrative Office at (252) 537-9137.

The Roanoke Rapids Sanitary District welcomes public participation in decisions concerning your water, wastewater, or distribution/collection systems. The District Board holds a public meeting the second Thursday of every month beginning at 5:30 P.M. at the Administrative Office, 1000 Jackson Street, Roanoke Rapids.

## Source Water Assessment

The North Carolina Department of Environment and Natural Resources (DENR), Public Water Supply (PWS) Section, Source Water Assessment Program (SWAP) conducted assessments for all drinking water sources across North Carolina. The purpose of the assessments was to determine the susceptibility of each drinking water source (well or surface water intake) to Potential Contaminant Sources (PCSs). The results of the assessment are available in SW AP Assessment Reports that include maps, background information and a relative susceptibility rating of Higher, Moderate or Lower.

The relative susceptibility rating of each source for The Roanoke Rapids Sanitary District was determined by combining the contaminant rating (number and location of PCSs within the assessment area) and the inherent vulnerability rating (i.e., characteristics or existing conditions of the well or watershed and its delineated assessment area.). The assessment findings are summarized in the table below:

| Susceptibility of Sources to Potential Contaminant Sources (PCSs) |                       |
|-------------------------------------------------------------------|-----------------------|
| Source Name                                                       | Susceptibility Rating |
| Roanoke Rapids Lake                                               | Moderate              |
| Roanoke River                                                     | Moderate              |

The complete SWAP Assessment report for RRSd may be viewed on the Web at: <http://www.deh.enr.state.nc.us/pws/swap> To obtain a printed copy of this report, please mail a written request to: Source Water Assessment Program – Report Request, 1634 Mail Service Center, Raleigh NC 27699-1634, or email request to [swap@ncmail.net](mailto:swap@ncmail.net). Please indicate your system name, PWSID, and provide your name, mailing address and phone number. If you have any questions about the SWAP report please contact the Source Water Assessment staff by phone at **919-715-2633**.

It is important to understand that a susceptibility rating of "higher" does not imply poor water quality, only the systems' potential to become contaminated by PCS's in the assessment area.

## Straight Talk On Water Conservation

*As a society, we have become more and more environmentally conscious and better informed about the effect our lifestyles can have on the world around us. Yet, the demand for our most valuable natural resource – drinking water – continues to grow while local supplies can be threatened by drought conditions and the cost of service increases. Only one percent of the earth's water is available for human consumption and yet, according to the latest U.S. Geological Survey, the United States uses 408 billion gallons a day. On the industrial level, numerous water-saving technologies have been employed to help conserve water. And while strong progress has been made, there are several simple steps that consumers can take to help preserve our water supply for future generations while controlling their monthly bill.*

### What can you do?

- Water your lawn early in the morning to reduce loss from evaporation. Do not over water your lawn. Place a tuna can on the lawn; when full, lawn watering requirements have been satisfied. Use lawn chemicals only when necessary.
- Fully load the dishwasher and clothes washer before running.
- When washing dishes by hand, or when brushing your teeth, do not leave the water running.
- Repair dripping faucets and leaky toilets. Dripping faucets can waste up to 2,000 gallons of water each year in the average home. Leaky toilets can waste as much as 200 gallons per day.
- If you have a swimming pool, use a cover. By so doing, you can cut the loss of water by evaporation by 90 percent.
- Use a broom, rather than a hose, to clean sidewalks or driveways.
- Defrost frozen food in the refrigerator or in a microwave instead of running hot water over the food.
- Raise the lawn mower blade to at least 3 inches. A lawn cut higher encourages grass roots to grow deeper, shades the root system and holds soil moisture better than a closely clipped lawn.

*Together, we share in the benefits of some of the safest drinking water in the world, and it is incumbent upon us all to protect this valuable natural resource for future generations. By making simple changes in our daily routines, we can feel confident that we are doing our part at the lowest possible cost.*

# 2013 Water Quality Report

## Treated Water Quality Roundup 2013

The Roanoke Rapids Sanitary District's number one priority is to provide all our customers with a safe and reliable supply of water that can be used with confidence. Every day, our employees are working to ensure that the water you drink meets all regulatory requirements and your expectations for safety, reliability, and quality.

To do this we conduct over 35,000 tests yearly on the water you drink. These tests start in the raw (untreated) water from the Roanoke Rapids Lake. (We also have an intake in the Roanoke River to draw water from in an emergency) We also run hundreds of tests on the water at different phases of the treatment process. The final tests are done on water from randomly selected homes and businesses. All of these test results are reported in accordance with the Water Quality Standards established by the United States Environmental Protection Agency (EPA) and the North Carolina Department of Environmental Health. We are proud to report that the water provided by the Roanoke Rapids Sanitary District exceeds all established water quality standards.

This 2013 WATER QUALITY REPORT is a summary of many of these tests and explanations of terms used in water quality reporting. If you have any further questions, please contact the WATER TREATMENT PLANT between 8AM and 4PM at (252) 537-3319.

### Lead & Copper Rule Testing

The 1994 Federal Lead & Copper Rule mandates a household testing program for these substances. According to the rule, 90% of the samples from high risk homes must have levels less than 0.015 mg/L of lead and 1.3 mg/L of copper. In 2013 lead levels in the District averaged .009 mg/L and copper levels averaged .216 mg/L, well below the Federal levels. Our next lead and copper testing will be conducted in June 2014. If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The Roanoke Rapids Sanitary District is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline 1-800-426-4791 or at <http://www.epa.gov/lead>.

### Special Concerns

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's [Safe Drinking Water Hotline \(800-426-4791\)](http://www.epa.gov/safewater).

Some people may be more vulnerable to contaminants in drinking water than the general population. Immunocompromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbiological contaminants are available from the [Safe Drinking Water Hotline](http://www.epa.gov/safewater) or at <http://www.epa.gov/safewater>.

## TERMS

**Maximum Residual Disinfection Level Goal** – The “Level” (MRDLG) of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

**Maximum Residual Disinfection Level-** The “Highest Level” (MRDL) of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

**Maximum Contaminant Level (MCL)-** An enforceable level of a contaminant as close to the goal as is practical to achieve in light of available treatment technology and cost/benefit considerations.

**Maximum Contaminant Level Goal (MCLG)-** A level of a contaminant, not necessarily achievable, safely below the level of human health concerns.

**Action Level (AL)-** The level of a contaminant at which a water treatment plant must take some type of action to reduce or contain the contaminant.

**Treatment Technique (TT)-** A required process intended to reduce the level of a contaminant in drinking water.

**Parts Per Million (PPM)-** Equivalent to milligrams per liter (mg/L). One part per million is comparable to one minute in two years.

**Parts Per Billion (PPB)-** Equivalent to micrograms per liter. One part per billion is comparable to one minute in two thousand years.

**Nephelometric Turbidity Units (NTU)-** Turbidity is a measure of cloudiness in water

## TURBIDITY

Turbidity is usually thought of as cloudiness of the water, and is caused by suspended matter. Organic and inorganic material, silt, algae or other tiny organisms can contribute to the turbidity of the water.

The degree of turbidity is measured at the Water Treatment Plant laboratory by shining a beam of light through water and measuring the angle at which the light is scattered by suspended matter. The reading gives the turbidity of the water measured in Nephelometric Turbidity Units (NTU'S).

Regulations passed in 1989 recognize reducing turbidity as one way to measure the removal or inactivation of certain targeted microorganisms. Currently, Giardia is one of those microorganisms and future regulations may include Cryptosporidium.

The EPA has established a Maximum Contaminant Level (MCL) for treated water turbidity of 0.3 NTU. The rule requires us to meet this standard 95% of the time during the month. In 2013, we met the standard 100% of the time with our highest reading at 0.123 NTU. For the year, we averaged 0.048 NTU.

| Constituent                | Highest Level Allowed (EPA'S MCL) | Ideal Goals (EPA'S MCLG) | Normal Range          | Frequency Of Sample | Sanitary District Annual Average | Sources of Constituents             |
|----------------------------|-----------------------------------|--------------------------|-----------------------|---------------------|----------------------------------|-------------------------------------|
| Fluoride                   | 4mg/L                             | 4mg/L                    | .65mg/L- .75mg/L      | Every 4 Hours       | .60mg/L                          | Naturally occurring, Water additive |
| Nitrate                    | 10mg/L                            | 10mg/L                   | 1 mg/L- 10mg/L        | Yearly              | Less than 1mg/L                  | Wildlife & septic systems           |
| Sodium                     | Not Regulated                     | 20mg/L                   | 15mg/L-25mg/L         | Yearly              | 6.4 mg/L                         | Naturally occurring                 |
| Sulfate                    | Not Regulated                     | 500mg/L                  | None                  | Yearly              | 7.1 mg/L                         | Soil runoff                         |
| Turbidity                  | .3NTU'S                           | Treatment Technique      | .1NTU-.5NTU           | Every 4 Hours       | .048 NTU'S                       | Soil runoff                         |
| Total Coliforms (Bacteria) | Less than 5% positive             | 0                        | Less than 5% positive | Daily               | 0                                | Naturally occurring                 |
| Iron                       | .3mg/L                            | .3mg/L                   | Less than .3mg/L      | Weekly              | .14 mg/L                         | Naturally occurring                 |
| Manganese                  | .05mg/L (Action Level)            | .05mg/L (Action Level)   | Less than .05mg/L     | Weekly              | .04 mg/L                         | Naturally occurring                 |
| pH (Standard Units)        | N/A                               | N/A                      | 6.5-8.0               | Hourly              | 7.51                             | N/A                                 |
| Alkalinity ,mg/L           | N/A                               | N/A                      | Less than 35 mg/L     | Daily               | 32.80 mg/L                       | N/A                                 |
| Hardness, mg/L             | N/A                               | N/A                      | 20mg/L-100mg/L        | Daily               | 39.39 mg/L                       | N/A                                 |

### Disinfection By-Product Precursors Contaminants

| Contaminant (units)                       | Sample Date | MCL/TT Violation Y/N | Your Water | Range |      | MCLG | MCL | Likely Source of Contamination       |
|-------------------------------------------|-------------|----------------------|------------|-------|------|------|-----|--------------------------------------|
|                                           |             |                      |            | Low   | High |      |     |                                      |
| Total Organic Carbon (ppm) (TOCs)-RAW     | Monthly     | N                    | 3.69       | 2.42  | 4.42 | N/A  | TT  | Naturally present in the environment |
| Total Organic Carbon (ppm) (TOCs)-TREATED | Monthly     | N                    | 2.18       | 1.49  | 2.70 | N/A  | TT  | Naturally present in the environment |

Note: Depending on the TOC in our source water the system MUST have a certain % removal of TOC or must achieve alternative compliance criteria. If we do not achieve that % removal there is an "alternative % removal". If we fail to meet that, we are in violation of a Treatment Technique.

| Contaminant (units)                 | MCL/MRDL Violation Y/N | Your Water (AVG) | Range Low High | MCLG      | MCL      | Likely Source of Contamination            |

# **“2013” Annual Drinking Water Quality Report “Town of Weldon”**

Water System Number: “04-42-020”

We are pleased to present to you this year's Annual Drinking Water Quality Report. This report is a snapshot of last year's water quality. Included are details about your source(s) of water, what it contains, and how it compares to standards set by regulatory agencies. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water and to providing you with this information because informed customers are our best allies. **If you have any questions about this report or concerning your water, please contact Jeff Elks at (252) 536-3478. We want our valued customers to be informed about their water utility. If you want to learn more, please attend any of our regularly scheduled meetings. They are held at the Town Hall on the second (2<sup>nd</sup>) Monday of each month at 7:00PM.**

## **What EPA Wants You to Know**

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline (800-426-4791).

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbial contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. [Name of Utility] is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safe-water/lead>.

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity. Contaminants that may be present in source water include microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife; inorganic contaminants, such as salts and metals, which can be naturally-occurring or result from urban stormwater runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming; pesticides and herbicides, which may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses; organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, and septic systems; and radioactive contaminants, which can be naturally-occurring or be the result of oil and gas production and mining activities.

In order to ensure that tap water is safe to drink, EPA prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. FDA regulations establish limits for contaminants in bottled water, which must provide the same protection for public health.

## **When You Turn on Your Tap, Consider the Source**

The water that is used by this system is the Roanoke River and is located at the HWY 48 bridge between Roanoke Rapids and Gaston, NC.

## Source Water Assessment Program (SWAP) Results

The North Carolina Department of Environment and Natural Resources (DENR), Public Water Supply (PWS) Section, Source Water Assessment Program (SWAP) conducted assessments for all drinking water sources across North Carolina. The purpose of the assessments was to determine the susceptibility of each drinking water source (well or surface water intake) to Potential Contaminant Sources (PCSs). The results of the assessment are available in SWAP Assessment Reports that include maps, background information and a relative susceptibility rating of Higher, Moderate or Lower.

The relative susceptibility rating of each source for the Town of Weldon was determined by combining the contaminant rating (number and location of PCSs within the assessment area) and the inherent vulnerability rating (i.e., characteristics or existing conditions of the well or watershed and its delineated assessment area). The assessment findings are summarized in the table below:

### Susceptibility of Sources to Potential Contaminant Sources (PCSs)

| Source Name                      | Susceptibility Rating | SWAP Report Date |
|----------------------------------|-----------------------|------------------|
| Roanoke River                    | Moderate              | March 2010       |
| In-Stream Raw Water Storage Pond | Moderate              | March 2010       |

The complete SWAP Assessment report for the Town of Weldon may be viewed on the Web at: [www.ncwater.org/pws/swap](http://www.ncwater.org/pws/swap). Note that because SWAP results and reports are periodically updated by the PWS Section, the results available on this web site may differ from the results that were available at the time this CCR was prepared. If you are unable to access your SWAP report on the web, you may mail a written request for a printed copy to: Source Water Assessment Program – Report Request, 1634 Mail Service Center, Raleigh, NC 27699-1634, or email requests to [swap@ncdenr.gov](mailto:swap@ncdenr.gov). Please indicate your system name, number, and provide your name, mailing address and phone number. If you have any questions about the SWAP report please contact the Source Water Assessment staff by phone at 919-707-9098.

It is important to understand that a susceptibility rating of “higher” does not imply poor water quality, only the system’s potential to become contaminated by PCSs in the assessment area.

### Violations that Your Water System Received for the Report Year

During 2013 or during any compliance period that ended in 2013 we did not receive any violations that covered the time period of 2013.

### Water Quality Data Tables of Detected Contaminants

We routinely monitor for over 150 contaminants in your drinking water according to Federal and State laws. The table below lists all the drinking water contaminants that we detected in the last round of sampling for the particular contaminant group. The presence of contaminants does not necessarily indicate that water poses a health risk. **Unless otherwise noted, the data presented in this table is from testing done January 1 through December 31, 2013.** The EPA and the State allow us to monitor for certain contaminants less than once per year because the concentrations of these contaminants are not expected to vary significantly from year to year. Some of the data, though representative of the water quality, is more than one year old.

Unregulated contaminants are those for which EPA has not established drinking water standards. The purpose of unregulated contaminant monitoring is to assist EPA in determining the occurrence of unregulated contaminants in drinking water and whether future regulations are warranted.

## **Important Drinking Water Definitions:**

**Not-Applicable (N/A)** – Information not applicable/not required for that particular water system or for that particular rule.

**Non-Detects (ND)** - Laboratory analysis indicates that the contaminant is not present at the level of detection set for the particular methodology used.

**Parts per million (ppm) or Milligrams per liter (mg/L)** - One part per million corresponds to one minute in two years or a single penny in \$10,000.

**Parts per billion (ppb) or Micrograms per liter (ug/L)** - One part per billion corresponds to one minute in 2,000 years, or a single penny in \$10,000,000.

**Parts per trillion (ppt) or Nanograms per liter (nanograms/L)** - One part per trillion corresponds to one minute in 2,000,000 years, or a single penny in \$10,000,000,000.

**Parts per quadrillion (ppq) or Picograms per liter (picograms/L)** - One part per quadrillion corresponds to one minute in 2,000,000,000 years or one penny in \$10,000,000,000,000.

**Picocuries per liter (pCi/L)** - Picocuries per liter is a measure of the radioactivity in water.

**Million Fibers per Liter (MFL)** - Million fibers per liter is a measure of the presence of asbestos fibers that are longer than 10 micrometers.

**Nephelometric Turbidity Unit (NTU)** - Nephelometric turbidity unit is a measure of the clarity of water. Turbidity in excess of 5 NTU is just noticeable to the average person.

**Action Level (AL)** - The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

**Treatment Technique (TT)** - A required process intended to reduce the level of a contaminant in drinking water.

**Maximum Residual Disinfection Level Goal (MRDLG)** – The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

**Maximum Residual Disinfection Level (MRDL)** – The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

**Maximum Contaminant Level (MCL)** - The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

**Maximum Contaminant Level Goal (MCLG)** - The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

## **Tables of Detected Contaminants**

**Microbiological Contaminants in the Distribution System** - For systems that collect *less than 40* samples per month)

| Contaminant (units)                                    | MCL Violation Y/N | Your Water | MCLG | MCL                                                                                                                                                        | Likely Source of Contamination       |
|--------------------------------------------------------|-------------------|------------|------|------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|
| Total Coliform Bacteria (presence or absence)          | N                 | 0          | 0    | one positive monthly sample                                                                                                                                | Naturally present in the environment |
| Fecal Coliform or <i>E. coli</i> (presence or absence) | N                 | 0          | 0    | 0 (Note: The MCL is exceeded if a routine sample and repeat sample are total coliform positive, and one is also fecal coliform or <i>E. coli</i> positive) | Human and animal fecal waste         |

### Turbidity\*

| Contaminant (units)                                                                 | Treatment Technique (TT) Violation Y/N | Your Water | Treatment Technique (TT) Violation if:                        | Likely Source of Contamination |
|-------------------------------------------------------------------------------------|----------------------------------------|------------|---------------------------------------------------------------|--------------------------------|
| Turbidity (NTU) - Highest single turbidity measurement                              | N                                      | 0.29 NTU   | Turbidity > 1 NTU                                             | Soil runoff                    |
| Turbidity (NTU) - Lowest monthly percentage (%) of samples meeting turbidity limits | 100%                                   | 100 %      | Less than 95% of monthly turbidity measurements are ≤ 0.3 NTU |                                |

\* Turbidity is a measure of the cloudiness of the water. We monitor it because it is a good indicator of the effectiveness of our filtration system. The turbidity rule requires that 95% or more of the monthly samples must be less than or equal to 0.3 NTU.

***While your drinking water meets EPA's standard for arsenic, it does contain low levels of arsenic. EPA's standard balances the current understanding of arsenic's possible health effects against the costs of removing arsenic from drinking water. EPA continues to research the health effects of low levels of arsenic, which is a mineral known to cause cancer in humans at high concentrations and is linked to other health effects such as skin damage and circulatory problems.***

### Nitrate/Nitrite Contaminants

| Contaminant (units)         | MCL Violation Y/N | Your Water | Range |      | MCLG | MCL | Likely Source of Contamination                                                              |
|-----------------------------|-------------------|------------|-------|------|------|-----|---------------------------------------------------------------------------------------------|
|                             |                   |            | Low   | High |      |     |                                                                                             |
| Nitrate (as Nitrogen) (ppm) | N                 | 0.23       | N/A   |      | 10   | 10  | Runoff from fertilizer use; leaching from septic tanks, sewage; erosion of natural deposits |
| Nitrite (as Nitrogen) (ppm) | N                 | <0.1       | N/A   |      | 1    | 1   | Runoff from fertilizer use; leaching from septic tanks, sewage; erosion of natural deposits |

***Nitrate in drinking water at levels above 10 ppm is a health risk for infants of less than six months of age. High nitrate levels in drinking water can cause blue baby syndrome. Nitrate levels may rise quickly for short periods of time because of rainfall or agricultural activity. If you are caring for an infant you should ask advice from your health care provider.***

### Asbestos Contaminant

| Contaminant (units)  | Sample Date | MCL Violation Y/N | Your Water | Range   |         | MCLG | MCL | Likely Source of Contamination                                    |
|----------------------|-------------|-------------------|------------|---------|---------|------|-----|-------------------------------------------------------------------|
|                      |             |                   |            | Low     | High    |      |     |                                                                   |
| Total Asbestos (MFL) | 1/3/13      | N                 | <0.1391    | <0.1391 | <0.1391 | 7    | 7   | Decay of asbestos cement water mains; erosion of natural deposits |

### Lead and Copper Contaminants

| Contaminant (units)                        | Sample Date | Your Water | # of sites found above the AL | MCLG | AL     | Likely Source of Contamination                                       |
|--------------------------------------------|-------------|------------|-------------------------------|------|--------|----------------------------------------------------------------------|
| Copper (ppm) (90 <sup>th</sup> percentile) | 9/18/13     | 0.06       | 0                             | 1.3  | AL=1.3 | Corrosion of household plumbing systems; erosion of natural deposits |
| Lead (ppb) (90 <sup>th</sup> percentile)   | 9/18/13     | 18         | 2                             | 0    | AL=15  | Corrosion of household plumbing systems; erosion of natural deposits |

### Total Organic Carbon (TOC)

| Contaminant (units)                                | TT Violation Y/N | Your Water (RAA Removal Ratio) | Range Monthly Removal Ratio Low - High | MCLG | TT | Likely Source of Contamination       | Compliance Method (Step 1 or ACC# ) |
|----------------------------------------------------|------------------|--------------------------------|----------------------------------------|------|----|--------------------------------------|-------------------------------------|
| Total Organic Carbon (removal ratio) (TOC)-TREATED | N                | 1.26                           | 38 80                                  | N/A  | TT | Naturally present in the environment | Step 1, ACC 4                       |

### Disinfectants and Disinfection Byproducts Contaminants

| Contaminant (units)                 | MCL/MRDL Violation Y/N | Your Water RAA (Stage 1) | Range Low High | MCLG        | MCL        | Likely Source of Contamination            |
|-------------------------------------|------------------------|--------------------------|----------------|-------------|------------|-------------------------------------------|
| TTHM (ppb) [Total Trihalomethanes]  | N                      | 49                       | 24-75          | N/A         | 80         | By-product of drinking water chlorination |
| HAA5 (ppb) [Total Haloacetic Acids] | N                      | 41                       | 17-68          | N/A         | 60         | By-product of drinking water disinfection |
| Bromate (ppb)                       |                        |                          |                | 0           | 10         | By-product of drinking water disinfection |
| Chlorite (ppm)                      |                        |                          |                | 0.8         | 1.0        | By-product of drinking water chlorination |
| Chlorine dioxide (ppb)              |                        |                          |                | MRDLG = 800 | MRDL = 800 | Water additive used to control microbes   |
| Chloramines (ppm)                   |                        |                          |                | MRDLG = 4   | MRDL = 4   | Water additive used to control microbes   |
| Chlorine (ppm)                      | N                      | 2.08                     | 1.2-2.5        | MRDLG = 4   | MRDL = 4   | Water additive used to control microbes   |

**For TTHM:** *Some people who drink water containing trihalomethanes in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous systems, and may have an increased risk of getting cancer.*

**For HAA5:** *Some people who drink water containing haloacetic acids in excess of the MCL over many years may have an increased risk of getting cancer.*

The PWS Section requires monitoring for other misc. contaminants, some for which the EPA has set national secondary drinking water standards (SMCLs) because they may cause cosmetic effects or aesthetic effects (such as taste, odor, and/or color) in drinking water. The contaminants with SMCLs normally do not have any health effects and normally do not affect the safety of your water.

### Other Miscellaneous Water Characteristics Contaminants

| Contaminant (units) | Sample Date | Your Water | Range Low/High | SMCL       |
|---------------------|-------------|------------|----------------|------------|
| Iron (ppm)          | 4/3/13      | <0.060     | N/A            | 0.3 mg/L   |
| Manganese (ppm)     | 4/3/13      | 0.010      | N/A            | 0.05 mg/L  |
| Nickel (ppm)        | 4/3/13      | <0.10      | N/A            | N/A        |
| Sodium (ppm)        | 4/3/13      | 17.0       | N/A            | N/A        |
| Sulfate (ppm)       | 4/3/13      | 14.6       | N/A            | 250 mg/L   |
| pH                  | 4/3/13      | 7.8        | N/A            | 6.5 to 8.5 |

## Consumer Confidence Report Certification Form

**Water System Name:** Town of Weldon

**Water System No.:** 04-42-020    **Report Year:** 2013    **Population Served:** 1670

The Community Water System (CWS) named above hereby confirms that all provisions under 40 CFR parts 141 and 142 requiring the development of, distribution of, and notification of a consumer confidence report have been executed. Further, the CWS certifies the information contained in the report is correct and consistent with the compliance monitoring data previously submitted to the primacy agency by their NC certified laboratory. In addition, if this report is being used to meet Tier 3 Public Notification requirements, as denoted by the checked box below, the CWS certifies that public notification has been provided to its consumers in accordance with the requirements of 40 CFR 141.204(d).

**Certified by: Name:** Julia M. Meacham      **Title:** Mavor

**Signature:** \_\_\_\_\_

**Phone #:** (252) 536-4836

**Delivery Achieved Date:** \_\_\_\_\_

**Date Reported to State:** \_\_\_\_\_

**The CCR includes text which provides mandated Public Notice for a monitoring violation (check box, if yes)**

---

Check **all** methods used for distribution (see instructions on back for delivery requirements and methods):

- Paper copy to all
- Notification of Availability of Paper Copy (other than in the CCR itself)  
Notification Method \_\_\_\_\_ (i.e. US Mail, door hanger)
- Notification of CCR URL      URL: \_\_\_\_\_  
Notification Method \_\_\_\_\_ (i.e. on bill, bill stuffer, separate mailing, email)
- Direct email delivery of CCR (attached? \_\_\_ or embedded? \_\_\_)  
Notification Method \_\_\_\_\_ (i.e. on bill, bill stuffer, separate mailing)
- Newspaper (attach copy)    What Paper? \_\_\_\_\_ Date Published: \_\_\_\_\_  
Notification Method \_\_\_\_\_ (i.e. US Mail, on bill, bill stuffer, door hanger, a postcard dedicated to the CCR, or email)
- “Good faith” efforts** (in addition to the above required methods) were used to reach non-bill paying consumers such as industry employees, apartment tenants, etc. Extra efforts included the following methods:
  - posting the CCR on the Internet at URL: \_\_\_\_\_
  - mailing the CCR to postal patrons within the service area
  - advertising the availability of the CCR in news media (attach copy of announcement)
  - publication of the CCR in local newspaper (attach copy)
  - posting the CCR in public places such as: (attach list if needed) \_\_\_\_\_
  - delivery of multiple copies to single bill addresses serving several persons such as: apartments, businesses, and large private employers
  - delivery to community organizations such as: (attach list if needed)

# INSTRUCTIONS

## Submittal of your CCR and Certification Form to the Public Water Supply Section

You may now submit your CCR and Certification form by either method described below. Follow the directions to ensure efficient tracking and receipt of your submittal and expedited review of report data by the Public Water Supply (PWS) Section for compliance with state and federal regulations.

➤ **By Email:**

- Provide your Water System Name and Water System Number (e.g. Water System Name - NC0101010) in the subject line of the email.
- If your CCR is displayed on a Web page, provide the direct URL for the report in the body of your email, and attach your completed Certification form to the email. (Note: Water systems without a web page/direct URL must attach both the CCR and the Certification form to the email as either a Word or PDF document.)
- Email your documents to: [PWSS.CCR@ncdenr.gov](mailto:PWSS.CCR@ncdenr.gov) (use 'Return Receipt Requested' to verify PWS Section's receipt.)

➤ **By Postal Mail:** Mail your CCR and Certification form to: Public Water Supply Section, 1634 Mail Service Center, Raleigh, NC 27699-1634, Attn: CCR Rule Manager.

## CCR Customer Direct Delivery Requirements (Based on Population)

- **Systems serving 100,000 or more persons must** post the CCR on a publicly-accessible Internet site using a direct URL.
- **Systems serving 10,000 or more persons must** distribute the CCR by mail or direct delivery.
- **Systems serving less than 10,000 persons but more than 500 persons must either:** (1) distribute the CCR by mail or direct delivery **OR** (2) notify their customers that the CCR is not being mailed, but it will be in what newspaper(s) and when (attach copy of notice). The complete CCR should be printed in the local newspaper, and a copy of the CCR must be made available upon request. *(The 2<sup>nd</sup> option is not acceptable if using the CCR for Tier 3 Public Notification!)*
- **Systems serving 500 or fewer persons must either:** (1) distribute the CCR by mail or direct delivery **OR** (2) notify their customers that the CCR is not being mailed, and a copy of the CCR must be made available upon request. *(The 2<sup>nd</sup> option is not acceptable if using the CCR for Tier 3 Public Notification!)*

## **CCR Direct Delivery Methods for Bill-Paying Customers**

| <b>CCR DELIVERY METHOD</b>                                                         | <b>METHOD DESCRIPTION</b><br>(Click link: <a href="#">EPA-CCR Rule Delivery Options Memo January 3, 2013</a> for referenced Appendix Figures below.)                                                                                                                                                                                                                                                                                                                                                                                 |
|------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Mail – paper copy                                                                  | CWS mails a paper copy of the CCR to each bill-paying customer.                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Mail – notification that CCR is available on web site via a direct URL             | CWS mails to each bill-paying customer a notification that the CCR is available and provides a direct URL to the CCR on a publicly available site on the Internet where it can be viewed. A URL that navigates to a web page that requires a customer to search for the CCR or enter other information does not meet the “directly deliver” requirement. The mail method for the notification may be, but is not limited to, a water bill insert, statement on the water bill or community newsletter. See Figure 1 in the Appendix. |
| Email – direct URL to CCR                                                          | CWS emails to each bill-paying customer a notification that the CCR is available and provides a direct URL to the CCR on a publicly available site on the Internet. A URL that navigates to a web page that requires a customer to search for the CCR or enter other information does not meet the “directly deliver” requirement. This method may only be used for customers when a CWS has a valid email address to deliver the CCR electronically. See Figure 2 in the Appendix.                                                  |
| Email – CCR sent as an attachment to email                                         | CWS emails the CCR as an electronic file email attachment [e.g., portable document format (PDF)]. This method may only be used for customers when a CWS has a valid email address to deliver the CCR electronically. See Figure 3 in the Appendix.                                                                                                                                                                                                                                                                                   |
| Email – CCR sent as an embedded image in an email                                  | CWS emails the CCR text and tables inserted into the body of an email (not as an attachment.) This method may only be used for customers when a CWS has a valid email address to deliver the CCR electronically. See Figure 4 in the Appendix.                                                                                                                                                                                                                                                                                       |
| Additional electronic delivery that meets “otherwise directly deliver” requirement | CWS delivers CCR through a method that “otherwise directly delivers” to each bill-paying customer and in coordination with the primacy agency. This category is intended to encompass methods or technologies not included above. CWSs and primacy agencies considering new methods or technologies should consult with the EPA to ensure it meets the intent of “otherwise directly deliver.”                                                                                                                                       |

## **Halifax County Resource Directory**

# HALIFAX COUNTY RESOURCE DIRECTORY

Sponsored by the Halifax County Community Child  
Protection Team

**This booklet contains information about services available to our citizens and how to obtain the services. All questionnaires that were returned to our office are included in the booklet. As you read this resource guide, please be aware that there may be services available that are not listed here. We only published information given to our office. We also apologize for any information that is incorrect or not updated. We try to keep the most current information included.**

**We sincerely hope this manual will be beneficial to our citizens and also helpful to our businesses.**

**We would like to thank all agencies that returned information and participated in any way toward the publication of this manual.**

**This publication will be updated once yearly. If you would like to make any changes or updates, please print out the section you are amending and make the changes/updates. For new entries, please see the attached form located at the end of the manual. Once the corrections, updates or entries are complete, send them to:**

## DIVISION OF JUVENILE JUSTICE

ADDRESS (Mailing): PO Box 407, Halifax, NC 27839  
ADDRESS (Physical): Halifax County Courthouse  
PHONE: 252-583-5371 FAX: 252-583-1266  
CONTACT PERSON: Clarence High, Jr., Chief Court Counselor  
HOURS OF OPERATION: Monday through Friday 8:00 a.m. - 5:00 p.m.  
After hours call 911

DESCRIPTION OF SERVICES: The Juvenile Court Counselor's Office provides services to those juveniles (any person who is less than 16 years of age for delinquent behavior, less than 18 for undisciplined behavior). These services are provided in two arenas, Intake and Probation/Aftercare.

Intake Services- When a petition (a criminal or undisciplined charge) is filed on a juvenile, it is the responsibility of the Intake Counselor to gather information from law enforcement, the child and the family, school and any other significant party which may have knowledge that could shed light on why the child may be experiencing difficulties. The Intake Counselor then uses this information, along with an assessment of the child the family's interest and ability to utilize local community resources to make a decision as to whether a case will go to Court, be diverted from Court to a local resource, or be closed. If the decision is to close the petition, the Counselor will provide the families with resource information that may be of benefit to them. In the case of a diversion, the Counselor may enter into a plan or contact that requires the juvenile to participate in a community -based services that may emphasize victim restoration and reconciliation, community service, guided growth services, and/or mental health treatment. If the decision is to approve the petition, the Counselor is responsible for relaying to the Court the information obtained while completing the intake evaluation and any recommendations felt appropriate as the Court considers disposition for the child.

In addition to the handling of formal complaints, Intake Counselors and other Juvenile Court Counselors when appropriate will provide consultative services to parties seeking general information on available community resources. Many situations regarding undisciplined children are handled as consultations rather than formal complaints.

Probation/Aftercare Services-When a child appears in Court and is found to be in need of services, the Court may place the child under supervision. It is at this time that the Juvenile Court Counselor is assigned to work with the child and family to ensure compliance with court mandates for sanctions or treatment.

There are two types of supervision; Protective Supervision and Probation. Protective Supervision allows the Juvenile Court Counselor to provide supportive counseling, resource information and referral services to the child and family where there are no criminal allegations. Probation supervision is a more restrictive disposition in that the Court will consider restrictive actions against juveniles should there be a general non-compliance of the Court's orders. In addition, the Court may order the parent of the juvenile to cooperate with a plan for the juvenile's rehabilitation.

Other Services- Juvenile Court Counselor's Offices across the state have a prominent role in local Juvenile Crime Prevention Councils (JCPC). Through the JCPC, state funding from DJJDP is matched with other local funds for local sanctions and treatment programs.

The Juvenile Court Counselor's Office in District 6 is available to the community to provide information and education regarding the juvenile justice system and our specific role in this system. We are involved in many agencies, organizations and community wide efforts that work to provide services for youth and families. Our work involves relationships with many varied resources (including but not limited to group homes, hospitals, volunteer agencies, Wilderness Camps, rehabilitation centers, employment agencies and schools). We are available to children and families seeking information about such resources on an information basis without their formal involvement in the Juvenile Court system.

### Easter Seals UCP NC & VA-Employment Services

ADDRESS: 1710 Watkins Drive, Weldon, NC 27890  
PHONE: 252-536-4105 FAX: 252-536-0119

ADDRESS (Physical): 26 King Street, Halifax, NC 27839  
PHONE: 252-583-1212  
CONTACT PERSON: Lonnie Hedgepeth  
HOURS OF OPERATION: 8:30 a.m. to 5:00 p.m. Monday-Friday  
DESCRIPTION OF SERVICES: The Halifax County Council on Aging is a board of volunteer adults, 60 years of age or over. The members are all appointed by the County Commissioners. The purpose of the Council on Aging Department is to help meet the many needs of the older adult, such as: nutrition, transportation, health, day care, and in-home services through recommendations from the board members and human services providers. These services enable people to get to necessary appointments, be assured of good nutrition, socialize, be less isolated from their peers and other groups and remain in their homes or with their family. Funding for these programs comes from the Home and Community Care Block Grant Funding plan that is made up of federal, state and local funds.

We also provide assistance to individuals who are seeking information about a specific service or problem they are having in obtaining the appropriate services needed. We have a prescription assistance program and also the SHIIP Program (Senior Health Insurance Information Program). We will be working with other local agencies on Medicare part D. We also have a resource book outlining all of the programs offered. Please call the office number for assistance or a resource book.

# HALIFAX COUNTY DEPARTMENT OF SOCIAL SERVICES

ADDRESS: 4421 Highway 301, PO Box 767, Halifax, NC 27839

PHONE: 252-536-2511

HOURS OF OPERATION: 8:30am-5:00pm Monday - Friday

**Temporary Assistance to Needy Families (TANF)** Contact Number: 252-536-2511

Financial and medical assistance to families with children deprived of parental support, with monthly payment based on needs and resources. Temporary assistance is provided to help families working toward employment and self-sufficiency.

**State/County Special Assistance (SA)** Contact number: 252-536-2511

Financial and medical assistance for individuals 18 and over who reside in residential care facilities.

**Medical Assistance (MA)** Contact Number: 252-536-2511

Medical assistance based on age, income and resources. Assistance includes medical, dental, vision, hearing, mental health, transportation and prescription services. This includes Carolina ACCESS. Carolina ACCESS offers case/disease management.

**NC Health Choice** Contact number: 252-536-2511

Insurance for children through age 18 whose parents are working yet cannot afford health coverage and are not eligible for medical assistance under the Medicaid program. Insurance is provided under the State Employees Health Plan by Blue Cross/Blue Shield. Some families may pay an enrollment fee based on income (maximum fee of \$100.00 annually). NC Health Choice covers all medical services including vision and hearing.

**Program Integrity** Contact number: 252-536-2511

Investigates suspected "Welfare Fraud" and ensures recovery of Public Assistance overpayments.

**Emergency Financial Assistance** Contact number: 252-536-2511

Crisis Intervention Program (CIP)-Provides financial assistance to eligible low-income persons who are experiencing a heating or cooling related crisis.

Work First Family Assistance (EA)-Provides short term financial assistance to households with needy children who are experiencing a crisis, not related to heating and cooling.

**Food Assistance** Contact number: 252-536-4521

Supplements the food dollars of low-income families and individuals and enables participants to purchase more nutritious foods.

**Low Income Energy Assistance (LIEAP)** Contact number: 252-536-2511

Financial assistance that is given once a year to help with the cost of heating.

**Child Support Enforcement Services** NC Child Support Call Center 1-800-992-9457

Mailing address: PO Box 409, Halifax, NC 27839

Assists in locating absent parents in an effort to establish and enforce financial and medical support obligations.

## **Child Protective Services**

Contact number: 252-536-6500 or 536-2511

To make reports of suspected child abuse, neglect or dependency, please contact the above numbers. After hours, weekends and holidays, you may dial 252-536-6500. We offer presentations concerning child abuse/neglect to various groups/organizations/businesses. Please contact us if you are interested.

## **Intake**

Reports of child abuse, neglect and/or dependency are made to the Intake Unit. Reports are assessed to see if the allegations meet the NC statutory definition of abuse, neglect or dependency. If the allegations do not meet the legal definition of abuse, neglect or dependency, the report is denied and assessed to see if it is appropriate to refer to other agencies. If the allegations meet the legal definitions, the report is then accepted. Currently North Carolina has a Multiple Response System (MRS), which allows cases to be assigned to either an Investigative Assessor or a Family Assessor depending on the type of allegations.

## **Investigative**

This response is a more formal information gathering process and is used for all cases of abuse and other special cases. Some of the characteristics are, the child is often interviewed first without the parents' knowledge or consent, collateral contacts are made without the parent's knowledge or consent, the report is either substantiated or unsubstantiated, and the perpetrator is entered into a centralized database.

## **Family Assessment**

This response is a more family centered approach. Some of the characteristics are that the parents are contacted and interviewed first, or at the same time as the child, collateral contacts are interviewed with the knowledge of the parents and preferably with their permission, the family is either found, "in need of services", "services recommended", "services provided" or "not in need of services", and no perpetrator is entered into a database. Services are implemented to remove the condition(s), which put the child or children in danger. The safety of the child in the home is always considered. If services cannot be provided in the home to ensure the child's safety, then removal of the child would be facilitated.

## **Case Management/Case Planning**

In cases where there is substantiation or a finding of "in need of services", the case may be referred to a Case Management/Case Planning social worker. Social work intervention designed to offer assistance to individuals and their family members in support of attempts to restructure or solidify their environment. Services include counseling on recognizing, understanding and coping with problems and conflict, household management, school related problems, family life, consumer affairs, and drug addictions. These intervention services are designed to help individuals and families in stabilizing their environment and in maintaining an adequate level of functioning to prevent further need for intervention.

## **Foster Care for Children**

The provision of services provided to children and their families to help facilitate the reunification of the family. When out-of-home placement is necessary, services are provided to families to eliminate the condition(s) that placed the child in danger.

Foster Care Licensing includes the licensing of foster and adoptive homes for children who are in need of temporary or permanent homes.

Independent Living Program provides independent living skills to children 16 to 21 that are or have been in foster care. Services include money management and awareness, housekeeping, food management, transportation, personal appearance and hygiene, basic job seeking and maintenance skills, interpersonal skills, health, legal issues, emergency and safety skills and knowledge of community services.

### **Adoption Services**

Services provided to children in the custody of the Halifax County Department of Social Services and prospective adoptive parents to help support and maintain the family. Children are placed with families in the hope that permanency can be achieved through the legal adoption of the child. Stepparents and relatives also receive adoption services.

### **At Risk Services**

At Risk Services are provided to any child who is at risk of being abused and/or neglected. These services are accepted by the family on a voluntary basis.

### **Eye Care Program**

Contact number: 252-536-6464

Services provided to the visually impaired to assist with the cost of eye examination, treatment, eyeglasses, ocular prosthesis, hospitalization, and surgery. Other services include transportation, counseling, mobility training aids, equipment, and In Home Aide Services.

### **Adult Protective Services/ Adult Protective Payee/Adult At Risk Services**

Contact number: 252-536-6459

Conduct investigations on reports of alleged abuse, neglect or exploitation of individuals 18 years of age or older. Services are provided to ensure the protection of these individuals who are not able to manage in their best interest. Services are provided to adults to prevent abuse, neglect or exploitation. An appointed payee may be necessary for individuals who are incapable of managing their income. As appointed payee the agency ensures that all-household expense, such as rent, electric and other bills are paid to ensure proper use of funds.

### **Community Alternative Program (CAP)**

Contact number: 252-536-6459

Home and community based services provided to Medicaid recipients whose medical condition requires the level of care provided in a nursing home.

### **Foster Care for Adults**

Contact number: 252-536-6459

Services that ensure placement appropriate to the individual's needs when they are unable to remain in their own homes; the recruitment, assessment, monitoring and supervision of adult care homes.

### **Adult Day Care Services**

Contact number: 252-536-6459

Arrange and pay for quality day care to support the adult's personal independence, promote social, physical and emotional well being; recruit, monitor and reevaluate certified programs and provide consultation and technical services.

### **Adult Guardianship Services**

Contact number: 252-536-6459

Provides services to legally declared incompetent adults.

### **Adult In Home Aide Services**

Contact number: 252-536-6459

In Home Aide Level I, II and III-assistance provided in the home for the elderly, disabled and handicapped individuals who can no longer perform necessary home management and personal care tasks and are at risk of institutionalization.

**Child Day Care Services**

Contact number: 252-536-2511

The purchase of quality day care services to allow parent to continue employment, to seek employment, to train for employment, and to protect neglected and abused children.

**Work First Employment Program**

Contact number: 252-536-2511

The Work First Program provides TANF recipients the opportunity to obtain the education, training and supportive services necessary to improve employability and avoid long-term dependency.

**Health Support Services**

Contact number: 252-536-2511

Services to individuals and families to help them recognize health needs and to receive appropriate treatment. Included are family planning services to enable individuals and families to voluntarily limit the number and spacing of children.

**Transportation Services**

Contact number: 252-538-6720

The purchase of services to enable Medicaid recipients to have access to adequate transportation when there is a lack of mean/or mode of transportation to Medicaid covered services.

**Reception Services**

Contact number: 252-536-2511

On Site: Individuals visiting the agency are registered, screened and directed to the appropriate program. Work permits are issued to youth and voter registration forms are completed during this contact.

Switchboard accepts all direct incoming calls and directs them to the appropriate program.

| <u>DESCRIPTION OF SERVICES:</u> | Water distribution; sewage collection; solid waste collection and disposal; wastewater pretreatment at the NC 903 Industrial Center.                                                                                                                                                                                                                                                                 |
| <u>HOW TO RECEIVE SERVICES:</u> | Water-apply in person at the Public Utilities Building in Halifax. Solid Waste-Call 583-1807 and state your request.                                                                                                                                                                                                                                                                                 |
| <u>OTHER INFORMATION:</u>       | Halifax County's enterprise operations are comprised of one department with three separate and distinct divisions: the Public Utilities Department is divided into the Water/Wastewater Division, Solid Waste Division, and the wastewater pretreatment division. With the exception of administrative staff, each division has separate staff and budget and operates independently from the other. |

The Water/Wastewater Division is responsible for providing safe drinking water to approximately 18,200 rural county residents and the collection and disposal of wastewater from approximately 1,000 rural residents. Obviously, the water distribution system is much larger than the wastewater collection system. Water and wastewater rates are adjusted annually to ensure funds are available for repayment of debt and for daily operations and maintenance.

The Solid Waste Division is responsible for collection and disposal of household garbage for approximately 36,584 rural county residents. This is currently being done through a contract with Waste Industries, Inc. One county-owned, centrally located landfill and eight convenience sites are available to county residents free of charge. Operation and maintenance costs are paid via an annual collection and disposal fee charged to each rural household and tipping fees charges to commercial clients at the landfill and Waste Industries's transfer station.

Halifax Regional is a private, not-for-profit acute care hospital with a 204-bed licensed capacity. The hospital offers a full range of in-patient and outpatient services including a unit dedicated to the psychiatric treatment of emotional and mental illness, individual case management and case management for area HIV/AIDS patients.

Woodside Psychiatric Unit, located on the hospital's Fourth Floor, provides intensive, short-term psychiatric treatment under the direction of a board-certified Psychiatrist. Woodside's nursing staff, social workers and activity therapists deliver care in a safe and confidential setting.

Our Case Management program is a collaborative multidisciplinary hospital-wide process available to aid patients and families in developing a workable post-hospital plan of care, provide psychosocial assessment and intervention when appropriate, assist with social issues and to act as a referral source, information source and liaison for patients, families, physicians and other members of the multidisciplinary team.

### **Hannah's Closet, an Outreach Program of Hannah's Place, Inc.**

258 Roanoke Avenue, 252 541-1127

Open Mon - Sat.

Our resale store is an important component of our overall program. We sell "gently used" women and children's clothing and accessories to the general public and accept donations for either our shelter or the store. Our clients DO NOT PAY FOR ITEMS THEY NEED FROM THE STORE, this is a part of the service we provide to all clients. Volunteers are always needed at the store to sort and prepare the items to be sold/distributed. There is information at the store about all of our programs and staff will be happy to either talk with you or arrange for one of the crisis intervention staff to talk with you.

DESCRIPTION OF SERVICES: System of Care/Families Supporting Families (SOC/FSF) is a 501(c)(3) charitable non-profit organization that operates a Family Resource Center located in Roanoke Rapids, North Carolina. We provide an array of community services and resources for mentally, emotionally and behaviorally challenged children/adolescents, ages 5-18, and their families. SOC/FSF is committed to building relationships and partnerships with youth who are academically challenged, at risk of school suspension, or court involved by creating educational, social and economic opportunities. We provide professional and strength based training, parent/youth support group meetings, family/youth driven activities, as well as develop strong advocacy skills.

HOW TO RECEIVE SERVICES: Families/Consumers receive services through a referral process (i.e. Local Agencies, Service Providers, Community Schools, Juvenile Justice and walk-ins) or contacting Mrs. Doris N. Mack at 252-535-4000.

Some of SOC/FSF Available services are: Advocacy services, Alternative Educational Program, Anger Management Training, Career/Vocational Training, Communication Skill Training, Cultural Arts Program, Family Attic-Thrift Store, Interpersonal Skills Training, Lending Library, Life Skills Training, A meeting facility, Peer Counseling, Mentoring, Youth and Family Support Group and Wraparound/Individual Care.

OTHER INFORMATION: SOC/FSF has Parent Support Group Meetings held at the Family Resource Center the 2<sup>nd</sup> Thursday of each month, from 6-8pm. Various topics on mental health issues are discussed. Youth Support Group Meetings are held in the Family Resource Center in Roanoke Rapids on the 2<sup>nd</sup> Thursday of each month from 6-8pm.
